Subject: FW: WOC - SIGNIFICANT AIR CARRIER ACCIDENT MU5735 03-21-2022
Importance: High

China Eastern flight 5735

- • B737-800, registration B-1791
- • Kunming to Guangzhou, crashed enroute near Wuzhou (about 150 miles WNW of Hong Kong)
- • Reported 123 pax and 9 crew. Presumed all fatal. Unknown AMCITs (likely not given the city pair)
- • AS-10 in contact with Boeing, GE, and FAA
- • Given COVID, geopolitical issues, location, and likely destroyed airplane, travel not imminent. Will wait for notification and additional information from CAAC.
- • GE has representatives in country and they are attempting to travel to region to obtain additional information.

Aireon ALERT: How to Discuss the Data

A Communications Guide and Template for External Communications and Media Relations

Thank you for contacting Aireon ALERT. Now that you have received your Aireon ALERT data package, we realize the importance of discussing the data with external parties, including the press. With that in mind, the Aireon ALERT team has created a communications handbook to help guide your external communications and media relations efforts for discussing and sharing the data. The following templates should be adjusted to match your specific situation.

Explaining the Data Source

Regardless of the situation, a common question that may come up is "where did you get the aircraft location data?". If and when this question is asked, we recommend using a version of the following statement:

We were able to locate the aircraft with position and location data provided by Aireon ALERT. The service uses Aireon's global space-based ADS-B data that is provided by the Irish Aviation Authority.

Classifying Your Data Request

Before sharing any information with the public and the press, it is critical to identify the nature of your situation. To help determine if your situation is a crisis or an abnormality, please reference the following criteria as a guide:

Sample Criteria for a Crisis:

- An ANSP has determined that an aircraft is in a "distress phase" requiring additional information to resolve the situation
- Aircraft in apparent distress
- Aircraft that has lost all communications and is in apparent distress
- Aircraft that has lost all communications and has disappeared (Ex: MH370)

Sample Criteria for an Abnormality:

- An ANSP has determined that an aircraft is in an "uncertainty" or "alert" phase
- Unexplained deviations or position and location inaccuracies
- Unexplained long gap in position reporting

Recommended Communications Processes and Templates

Crisis Situation

When in a crisis situation, we *recommend* not immediately sharing the data and instituting a 24-hour holding period before sharing any location data publicly. This will prevent unwanted attention to the site and will allow for effective and efficient deployment of emergency response efforts. Upon receiving your data package, we *recommend* issuing a holding statement to key stakeholders and media, keeping them informed of progress. If you receive media inquiries during the crisis, we *recommend* sticking to the messaging in the following templates until the 24-hour holding period lifts.

Generic Holding Statement:

- **Recommended Holding Statement Distribution Methods:**
  - Email to external and internal stakeholders
  - **Social Media**: Facebook and Twitter
  - Email Auto Reply

- **Template:**

  *We can confirm that **[' today' or 'on Day']** at **[INSERT TIME]** we lost communications with **[INSERT AIRCRAFT].** We are working to relocate and regain communications with **[INSERT AIRCRAFT]** and are in coordination with **[INSERT REGIONAL AUTHORITIES/ANSP]** and **[INSERT RESCUE ORG].** We are in communication with Aireon ALERT to pinpoint the last known position of the aircraft. Our main priority is the safety of those onboard the aircraft and we are working as quickly as possible to deploy aid. Another update will be coming **['within the hour' or 'as soon as more information is available']**.*

Follow-up Statement

During this holding period (before issuing the data publicly) we *recommend* releasing a follow-up statement to keep key stakeholders and media in the loop on the situation.

- **Recommended Holding Statement Distribution Methods:**
  - Email to external and internal stakeholders
  - **Social Media**: Facebook and Twitter
  - Email Auto Reply

- **Template:**

  ['today' or 'on Day'] *we received the exact last known position of* ***[INSERT MISSING/DOWN AIRCRAFT]*** *from Aireon ALERT. Once received, we were able to immediately deploy aid to the site. In order to not interfere with ongoing aid and recovery efforts, we will not be sharing the data with the public at this time. We appreciate your patience and will provide another update in* ***[INSERT APPROPRIATE # OF HOURS].***

Recommended 24-Holding Period Lifts

After the *recommended* 24-hour holding period, feel free to share the data publicly with whomever you choose. When dealing with the media, we recommend issuing a media brief to a targeted list of reporters. If you had members of the media reach out during the crisis, they should be included in your media relations efforts.

Formally Sharing the Data with the Press

- **Media Brief Template:**

  [INSERT LOCATION] – [INSERT DATE] *– At* ***[INSERT DATE AND TIME], [INSERT AIRCAFT]*** *was located at* ***[INSERT LOCATION].*** *Immediately upon confirmation of the aircraft's location, emergency response teams were deployed, and recovery efforts commenced.* ***[INSERT UPDATE ON RECOVERY EFFORTS].***

  The data was promptly provided by Aireon ALERT, giving our team the exact last received ADS-B position of the aircraft, including a 4-dimenstional report containing latitude, longitude, altitude and time. Additionally, we were given a map of the last 15-minutes of flight to help target the exact region of ***[INSERT AIRCRAFT].***

  If you have any questions or require additional information, please contact ***[INSERT MEDIA CONTACT].***

Abnormalities and/or Routine Requests

Upon receiving your Aireon ALERT data package, we *recommend* issuing a generic holding statement to keep key external and internal stakeholders apprised of the situation. To avoid causing unnecessary public panic, we do not recommend any proactive media outreach regarding the abnormality. However, if you are receiving media inquiries about the situation, below is a template with recommended messaging to use.

Generic Holding Statement

- **Recommended Holding Statement Distribution Methods:**
  - Email to external and internal stakeholders
  - Email Auto Reply
  - **Social Media:**
    - Depending on how public the situation is, refraining from social media is recommended. This will help prevent panic and will avoid drawing unwarranted attention to the abnormality.

- **Template:**

  *We can confirm that **['today' or 'on Day']** at **[INSERT TIME]** we experienced **[INSERT SITUATION]**. We are working with air traffic control and **[INSERT REGIONAL AUTHORITIES]** to resolve the issue as quickly as possible. We are also in communication with Aireon ALERT to pinpoint the last known position of the aircraft and will provide an update once additional information is made available.*

Follow-up Statements – If data has not been released

If the issue is still ongoing and more time is anticipated to reach resolution, we recommend issuing a follow-up statement to keep key audiences in the loop on progress being made. Below is a template to use in the event you are not able to share the data yet.

- **Template**

  *We can confirm that there was an **['issue' or 'abnormality' regarding 'insert component']** on **[INSERT AIRCRAFT].** We are working with **[INSERT ORGS AND TEAMS]** to resolve this as quickly as possible and expect to reach resolution shortly. We will provide another update **[INSERT DESIRED TIMEFRAME].** All crew members and passengers onboard the aircraft are safe. Thank you for your patience.*

Formally Sharing the Data with the Press/Media

Once the issue has officially been resolved, you may share the data with whomever you choose. However, it is important to consider the ramifications of publicizing the abnormality. If it is determined that sharing information will cause unwanted panic and attention, we do not recommend any proactive outreach to the media. But, if it is determined a proactive approach would be beneficial, and if you had reporters reach out during the abnormality, below is a media brief template with suggested messaging to consider.

- **Sample Media Brief**

  [INSERT LOCATION] – [INSERT DATE] *– At* ***[INSERT DATE AND TIME], [INSERT AIRCAFT]*** *experienced* ***[INSERT WHAT HAPPENED].*** *We are proud to report that* ***[INSERT ABNORMALITY]*** *has been resolved and we are conducting a thorough investigation to prevent this from happening again. All crew members and passengers on board the aircraft are safe.*

  We were given vital aircraft position and location data from Aireon ALERT, allowing us to immediately begin working toward a resolution. The data gave our team the exact last received ADS-B position of the aircraft, including a 4-dimenstional report containing latitude, longitude, altitude and time. Additionally, we were given a map of the last 15-minutes of flight to help target the exact region of ***[INSERT AIRCRAFT].***

  If you have any questions or require additional information, please feel free to contact ***[INSERT MEDIA CONTACT].***

Requests for Aireon Data to Support Post Incident Investigations

If authorities require more detailed Aireon surveillance data to aid and support post incident analysis and investigations, request for assistance should be made to:

Sathya,
We don’t have immediate access (contract) to the satellite based data anymore however Aerion indicated previously that they would assist on an accident. Matt is currently working it with a POC he has who is going through some internal channels to try an obtain it. We will let you know.

Good morning Sathya,

Could you please include myself in correspondence/discussions regarding information on MU5735? I will be the POC from AVP100 at least until a launch decision is made. Please let me know if there is anything our agency can provide to assist you.

Regards,

Dave Keenan
